Guide To Custom Colour Process

Bringing distinctive visions to life through the art of design

Leverage Waaltzz's exquisite artwork through our custom colour option tailored for your project. We empower designers to craft their unique palette, offering a simple process without extending minimums or lead times.

Step 1: Share your details and inspiration

1. Provide comprehensive installation details, including elevations or accurate dimensions for your project.
2. Explore our installation recommendations and terms and conditions for wallpaper, canvases, and vinyl products.
3. Choose a pattern for customisation and assemble your ideal colour palette. Share your inspiration through samples or paint swatches (e.g., Asian Paints, Nippon, Berger, Benjamin Moore, Sherwin Williams).
4. For accurate matching, furnish physical references for every colour in your custom

choices, indicating replacements on a colour map.

5. Note that we cannot match digital images due to monitor colour variations.
6. Customise as many or as few colours as desired. Additional colours can be added, and treated as a Custom Pattern Element order (additional fees apply).

Step 2 : Request a quote

1. Upon submitting the required details, receive a project estimate for your Custom Colour project. The Custom Colour fee is 15%..

Step 3 : Lets get started

1. Once we receive the project's 50% deposit, production commences. Explore our complete production process and lead times with our representatives.

OPTIONAL STRIKE OFF

If you prefer seeing custom colour options before committing to a full order, we offer Custom Colour Strike Offs to aid your decision-making.

These 3' x 3' samples, available for \$150, showcase your palette in real life.

The lead time is 3 weeks, and once approved, your Custom Colour Strike Off becomes the working sample for your full order.

Note: The lead time for a full order process remains unaffected by the Strike Off.
