## Guide To Customised Pattern Elements Process

Bringing distinctive visions to life through the art of design

Waaltzz's distinctive handmade process offers an unparalleled opportunity to personalise our standard wall coverings and textiles. Whether it's adjusting scale, colour, or composition, every aspect of a pattern can be modified to align with your project. Just as interior design defies a one-size-fits-all approach, we relish in providing designers with the capability to realise their most audacious visions and transform their clients' dreams into reality through customisation.

### **Step 1: Share your details and customise**

1. Provide comprehensive installation details, including elevations or precise measurements for your project.
2. Explore our installation recommendations and terms and conditions for wallpaper, canvases, and vinyl products.

3. Customise any standard pattern elements to align with your artistic vision. Specify changes needed for your custom project, such as altering scale, and density, adding colours, or adjusting opacity, shapes, and line quality.
4. Note that solely changing colours constitutes a Custom Colour change.

### **Step 2 : Request a quote**

1. Once all necessary details are submitted, receive a project estimate for your customised project. The Custom Scale fee starts at 20% and may vary based on the complexity of composition changes.

### **Step 3 : Lets get started**

1. Upon receipt of the project's 50% deposit, production kicks off. Explore our complete production process and lead times with our representatives.

## OPTIONAL STRIKE OFF

If you prefer seeing custom colour options before committing to a full order, we offer Custom Scale Strike Offs to aid your decision-making.

These 3' x 3' samples, available for \$150, showcase your palette in real life.

The lead time is 3 weeks, and once approved, your Custom Scale Strike Off becomes the working sample for your full order.

Note: The lead time for a full order process remains unaffected by the Strike Off.
